ROPESCAPES™ QUITO™

Quito (pronounced KEE-toe) is a freestanding net climber that takes kids on a journey to the center of the web. Inspired by Quito, Ecuador, the capital city closest to the equator and the world's second highest capital city, Quito stands a towering 15.54' (4,74m) high. Its daring, distinctive design offers a commanding, compelling playground presence. Children will feel like geometric spelunkers as they climb, balance, and teeter their way in, over, and through the colorful center. With multiple points of entry, Quito includes an easy passage to the center, as well as a cozy space underneath.

BALANCE TRAX
PAGE 130

8

1. THE 'COOLEST THING'

Identify the piece of equipment that children will be the most excited about, and ensure it's usable for all.

2. SOCIAL PLAY

Provide play events that stimulate the imagination. Carefully select and place equipment to provide opportunities for solitary, parallel, associative, and cooperative play.

3. SENSORY PLAY

Incorporate activities that engage the auditory, tactile, proprioceptive, visual, and vestibular sensory systems.

4. LEVELS OF CHALLENGE

Choose physical play activities that provide graduated levels of challenge, ensuring all ages and abilities are actively engaged on the playground.

5. ZONES

Invite engagement between children of diverse abilities by locating similar types of equipment in the same area. Set the zones so that they're easily found via an orientation path, which guides people to different areas of play.

6. ROUTES AND MANEUVERABILITY

Routes through the play area should be wide enough for people in wheelchairs to pass one another, and to enter, turn, and exit without difficulty.

7. UNITARY SURFACING

Protective surfacing forms a unitary shock absorbing surface, which makes it easier for wheelchairs and strollers to enter and navigate the play space.

8. FENCING

Important to keep children safe so they don't run or wander out of the play space. A contained play area is especially helpful for those on the autism spectrum.

INCLUSION'S INFLUENCE

Inclusive designs not only make an impact on the playground, but on the next generation of your community. By creating zones, offering a variety of challenges, and ensuring maneuverability, you're fostering a fun, welcoming environment for all to enjoy in the years to come.

Playworld uses high quality materials and state-of-the-art manufacturing processes. Commercial playgrounds and products are subjected to years of environmental and solar exposure. Such extreme exposure takes its toll on paints and pigments, and all colors will fade over time. Playworld does not warrant against color fading or discoloration. It is important to properly maintain your playground to ensure its longevity. Depending on environmental conditions at your location, the installation of fabric shade structures may help to delay fading and discoloration.
