「Discover
playground worlds」

「Welcome to eibe」

DEAR EIBE CUSTOMER,

Protecting our environment is a responsibility that we bear today in order to provide a better future for our children. By making sustainable decisions and conserving resources, we are helping to ensure that future generations can also grow up carefree. That is why, as a manufacturer of play equipment, we place a high value on sustainable materials and environmentally friendly production.

An important part of this philosophy is our commitment to the circularity. This means that our play equipment is manufactured in a resource-efficient manner, without the use of harmful or hazardous substances, from renewable raw materials, using recycled materials, and can be returned to the recycling loop at the end of its service life. This creates a product cycle in which raw materials are conserved, CO2 emissions are reduced and waste is avoided. This is how we create long-lasting and future-oriented products that not only inspire children and adults, but also protect our planet.

Of course, the satisfaction of our customers is most important to us, which is why we support them in the best possible way in the implementation of all projects. With competent specialist advisors and an experienced planning team, we can turn your ideas into reality. Whether individual play points or complete play worlds, we plan and build individually, always matching your facility and, of course, to the highest quality.

Take your time to discover the diversity of our play equipment.

We hope you enjoy browsing.

Best regards,

Your eibe team

「Company & Philosophy」

WHO WE ARE

We are at home in Röttingen, a small town in northern Bavaria. This is where we have been creating high-quality play and sports worlds with a holistic approach and ecological foresight since 1973.

Developing and manufacturing imaginative, educationally valuable play worlds of the highest quality, while taking into account environmental and sustainability aspects, has been our declared company goal for over 50 years.

What started out as a small workshop has now become a successful, internationally operating family business with one of the most modern industrial development and production facilities for play equipment in Germany.

OUR TARGET GROUPS

Architects

With technical expertise, strong concepts and expert advice at your side.

Child care

Comprehensive, age-appropriate concepts and educationally sound play areas that promote child development.

Park & Zoo

Characteristic themed play worlds with a wow effect and high recognition value.

Leisure & Tourism

Theme parks and attractions of all sizes and themes, which leave a lasting impression on visitors.

Towns and communities

Attractive, cross-generational play and exercise facilities for public spaces with a high play value and a long service life.

Housing construction

Playpoints for your neighbourhood, offering excellent value for money, improving quality of life and creating connections.

Schools and education

Holistic concepts can be used to transform a school playground into a place of adventure where children can move, play and learn.

OUR VALUES

「Nature & Environment」

The protection of nature and the environment has maximum priority for us.

「Play & Movement」

The focus is on people: their physical and mental health.

「Responsibility & Service」

The quality must be right – this applies to products, services and advice.

WHAT WE STAND FOR

From public playgrounds to daycare centres and schools, from campsites to adventure parks and restaurants – eibe has made its mission to support children and young people in their development with innovative products and to motivate children, young people and adults to be more active. This is achieved with well-thought-out play and exercise concepts, the meaningful integration of new trends and natural, exciting materials.

Environment & Ecology

SUSTAINABILITY, ENVIRONMENTAL PROTECTION, ECO-BALANCE

This trio promises sustainability. All three aspects are among the most important corporate values of the eibe group. Sustainable activities in the areas of workplace, community, economy and ecology help to continuously implement these values. These include, among others:

- Fair treatment of people in the company and our customers
- Promotion of inclusion, equal opportunities and diversity in the company and in product development
- Involvement in associations and cooperation with clubs and initiatives in the region
- Transparent corporate governance
- Environmental management and climate protection
- Energy efficiency
- Sustainable process and value chain
- Care in the supply chain, e.g. respect for human rights, ecological sustainability
- Product safety and consideration of product life cycles

HOW WE PUT OUR ENVIRONMENTAL THINKING INTO PRACTICE:

- Wood from exemplary forestry, guaranteed 100% FSC®-certified (COC).
- Use of resistant woods for outdoor areas.
- Environmental management and environmentally friendly products. In addition to avoiding residual waste as much as possible, we cover 90% of our heating needs with scrap wood, shavings and sanding dust.
- Ecologically sound manufacturing processes and production equipment – from electric forklift trucks to chrome-free impregnation.
- Heat recovery and direct air supply save energy costs and reduce emissions.

We use HPL material from the company Pfeleiderer Deutschland GmbH. The material is certified with the German eco-label 'Blue Angel'.

www.blauer-engel.de/uz76

- low emissions
- wood from sustainable forestry
- no adverse impact on health in the living environment

WOOD AND ENVIRONMENTAL PROTECTION

For over 50 years, we at eibe have been developing and producing high-quality and educationally valuable play equipment. It is of great concern for us to manufacture play equipment that is as environmentally friendly and sustainable as possible.

For our products, we rely on environmentally friendly and ecologically sensible materials and only use raw materials that are free of harmful substances. That's why we use environmentally friendly and ecologically sound materials for our products and only use raw materials that are free of harmful substances. As former carpenters, we are real wood experts! We know the value of this raw material and are familiar with strict processing criteria. Wood is one of the best raw materials of all when it comes to CO₂ neutrality and resource conservation.

The harmful greenhouse gas carbon dioxide (CO₂), which every tree extracts from the atmosphere during its growth phase, is harmlessly bound as carbon (C) in wooden products over their entire service life. eibe play equipment made of wood thus acts like a CO₂ battery over its entire product life cycle.

Our certifications

The mark of responsible forestry

Environmental management system
ISO 14001:2015

「Sustainability & Circularity」

WHAT IS CIRCULARITY?

Circular building means not using up materials, but using them over time. When a piece of play equipment has reached the end of its service life, but still contains functional parts, these can be incorporated into another eibe product. In this way, we meet our sustainability requirements and at the same time meet the growing demand for recycled products.

ADVANTAGES OF CIRCULARITY

- Resource efficiency
- Durability
- Repair-friendliness
- Use of renewable raw materials
- Use of recycled materials
- Resource-efficient prefabrication
- Securing product quality
- CO₂ emissions as a basis for decision-making

NEW EQUIPMENT PRODUCTION

- New parts from re-use and/or refurbished parts

PLAY UNIT – OLD EQUIPMENT

- Take-back offer
- Dismantling-friendly
- Reuse of refurbished parts

NEW EQUIPMENT DESIGN & PLANNING

- Use of renewable raw materials
- Avoiding hazardous and harmful substances
- Observing environmentally friendly and responsible supply chains
- CO₂ emissions as a basis for decision-making

OUR PRODUCTS ARE OFFICIALLY TESTED

We have the products from our own production tested in cooperation with the company Gesellschaft für Klimaschutz München GmbH and determine the circularity score. Thanks to the careful selection of raw materials, our products achieve excellent results. Nevertheless, we continuously strive to optimise the results even further.

「Service & Conseil」

THE QUALITY MUST BE RIGHT. THIS APPLIES TO PRODUCTS, SERVICES AND ADVICE.

eibe offers professional all-round service from planning to installation. Your wishes are implemented by specialists in creative complete concepts. Together with you we fix project stages and determine costs.

THE TASKS INVOLVED IN PLANNING A PLAY WORLD ARE MANY AND VARIED.

Play value, attractiveness, educational demands are just as important planning factors as durability, safety and ecological sustainability. We at eibe are a competent partner – even if special site-specific requirements or special target groups have to be taken into account.

We offer you a full service: from A to Z, internationally and with globally active partners directly on site.

THIS IS HOW YOU BENEFIT:

- Personal expert advice
- Individual and creative concept development
- Well thought-out playground planning according to international guidelines
- Professional project management and on-time realisation
- Tailor-made financing according to your needs

「Reliability & Safety guaranteed」

YOUR CAN CERTAINLY RELY ON US:

Our eibe team makes sure that playground equipment is exactly tailored to the needs of our customers and plans meticulously down to the smallest detail. Punctuality is just as important to us as the careful assembly of play equipment. Because when it comes to playground equipment and playground installations, we are the partner you can trust.

THE IDEAL PARTNER WHEN IT COMES TO SAFETY.

It is not for nothing that our products are produced in Germany and put through their paces before they are released for use.

Our products are certified and meet all the required EU standards. After all, the safety of our children is also in our hands.

That makes us reliable:

- For decades, we have been happy to be personally on site for you.
- Careful project management and proactive communication.
- We implement our customers' wishes within budget and conscientiously.
- Defined and regularly certified quality standards according to ISO 9001.

All our play units comply with the

EN 1176

and

EN 16630

standards

「The eibe brand world」

FROM TODDLERS TO SENIOR CITIZENS –

eibe takes into account the needs of all playground enthusiasts and movement fans! In order to keep our diverse product range as clear as possible, we have developed our eibe brands.

The following applies to all brands

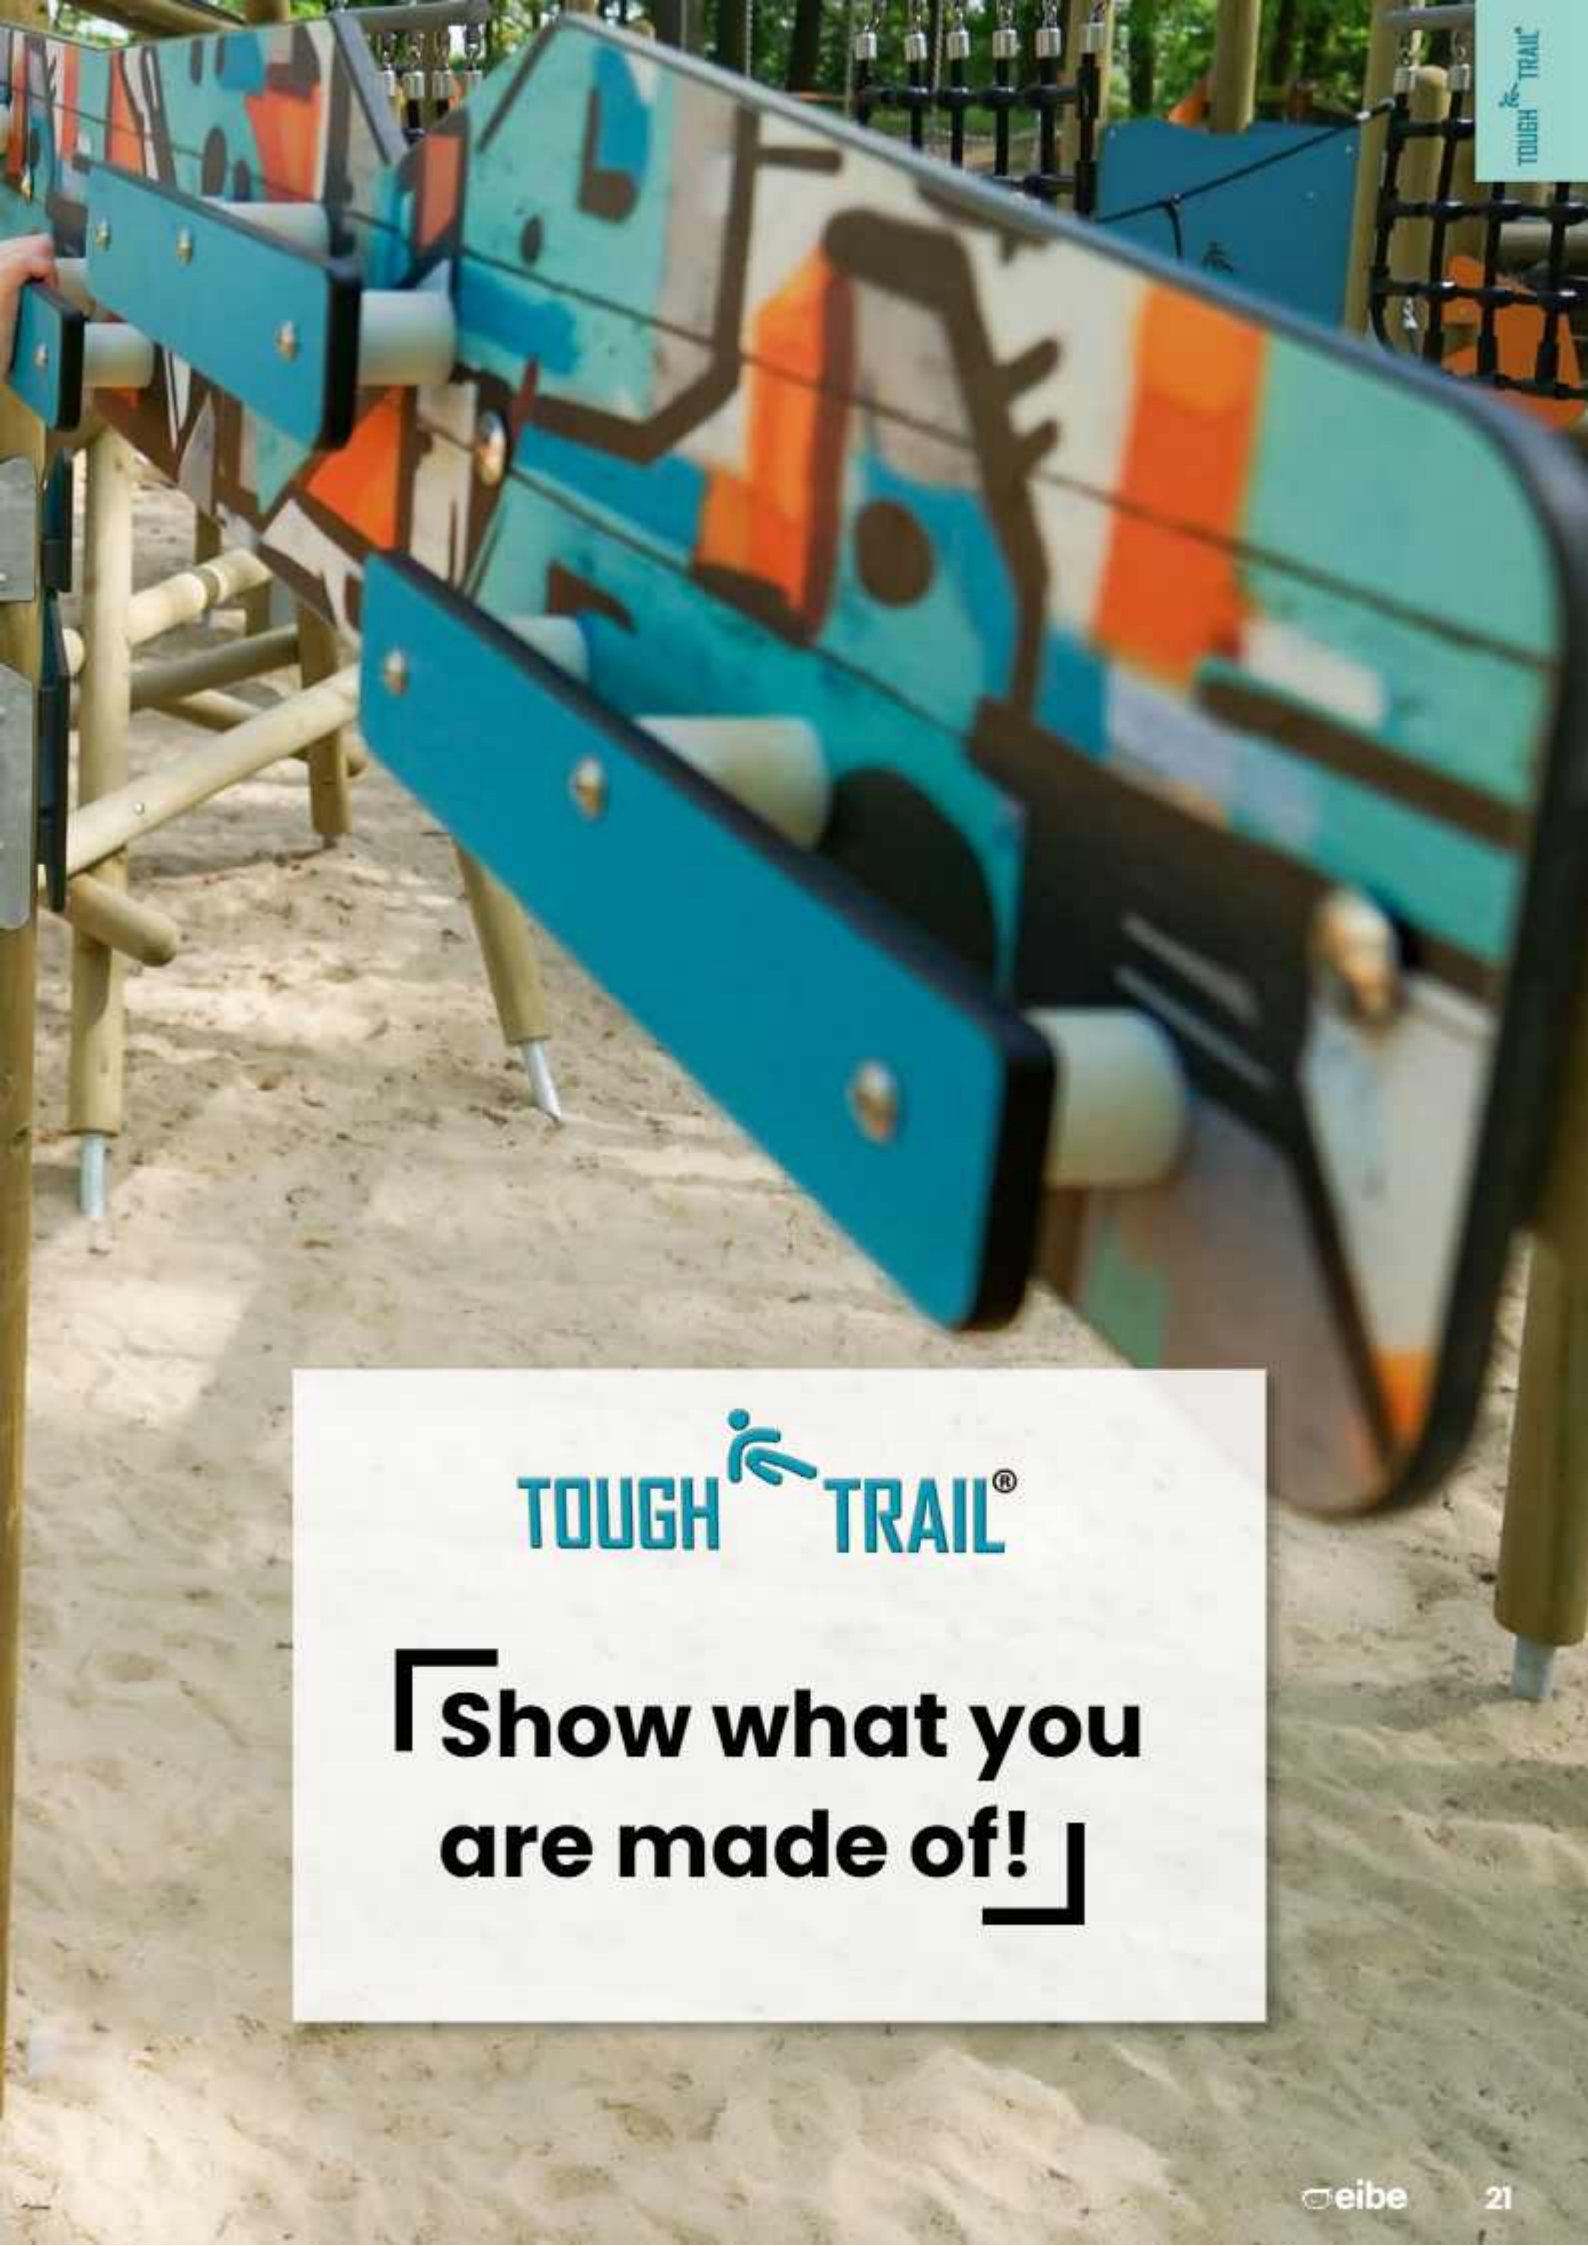

- Highest play value
- First-class function
- High product quality
- Maximum safety
- Creative solutions
- Varied design
- Low maintenance costs
- Long-term investment

INFINITELY MODULAR

eibe brands are both modular and thus flexible within the product line as well as combinable: individual brands can be mixed in a meaningful way. This ensures an enormous variety of design possibilities! But what are the differences between the brands and which one suits your playground profile best?

		page
	Particularly robust equipment for maximum load, designed for everyone at any age who loves sport – or wants to learn to love it!	20
	Sporty enrichment! Complements the eibe unique programme for even more fun and excitement. Modular climbing system, flexibly adaptable.	28
	A natural individualist! Natural look, ideal for high-concept installations. Organic, natural, imaginative, durable.	38
	Inspiring challenge! Imaginative play equipment for complex combinations that activate holistic play.	72
	Premium concept! Ideal for public play areas and large facilities. Modular, combinable, high-quality, extra-robust.	80
	Versatile for the little ones! For adventure courses and playscapes. Particularly safe, especially for toddlers. Imaginative and colourful.	98
	The all-rounder at a great price! Universally applicable, smallest to largest installations. Ideal for public spaces.	108
	The educational all-rounder! For supervised areas. Attractive design, for fun, movement and imaginative play.	126
	Play metal! Cool play systems made of metal, designed for the children's delights and highest demand in any play area.	146
	Be active in a meaningful way! Motivating fitness equipment for young and old. Ideal for parks, schools and sports facilities. Ergonomic and safe.	170
Seating arrangements and park furniture	The perfect complement for well thought-out playgrounds. Shapely benches, tables and seating groups, barbecue concepts and accessories.	186
Basis	Wide range of complementary products such as single slides, climbing equipment, swings, small and spare parts.	196
	Well thought-out indoor system! The eibe outdoor competence for indoor playgrounds with maximum experience value.	226

TOUGH  TRAIL®

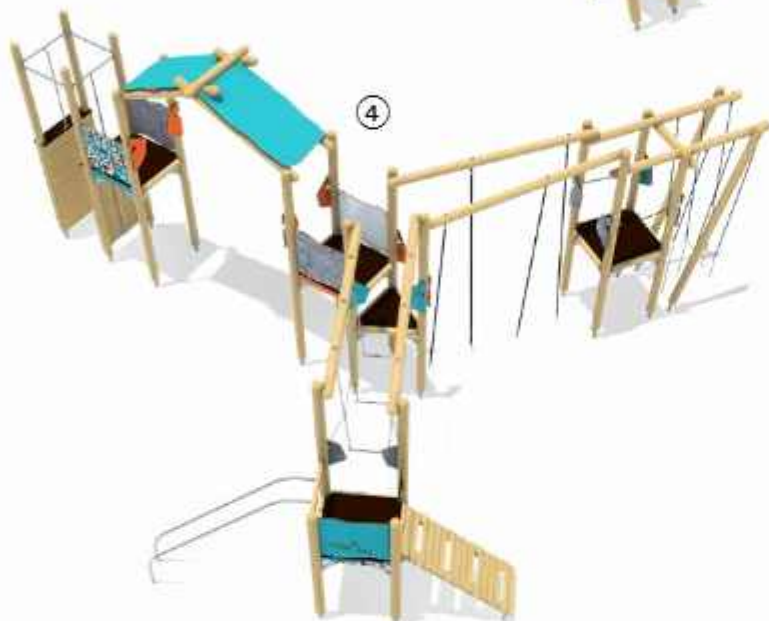

「Show what you
are made of!」

The tough trail focusses on the needs of young people.

Teenagers are looking for that special kick, want to compete with others, test their limits, go their own way and gain experience independently. Both their demands and their bodies have outgrown the traditional playground. We have grown with them and have developed the tough trail: a new playground concept in the form of an exciting play and adventure space that is fully geared towards the needs and realities of today's young people.

Here they encounter sporting challenges that correspond to their physical and mental development phases as well as their interests and offer a high leisure and recreational value. The action-packed movement games on the spectacular obstacles allow the kids to fulfil their urge to move in a challenging way. They train cognitive and motor skills and at the same time strengthen their self-esteem. By encouraging and supporting each other, the youngsters learn from each other and experience respect, tolerance and fair play. The tough trail motivates young people to exercise, helps them to reduce stress and promotes social interaction.

「Experience action,
overcome challenges!」

「Our ground-level
course concept.」

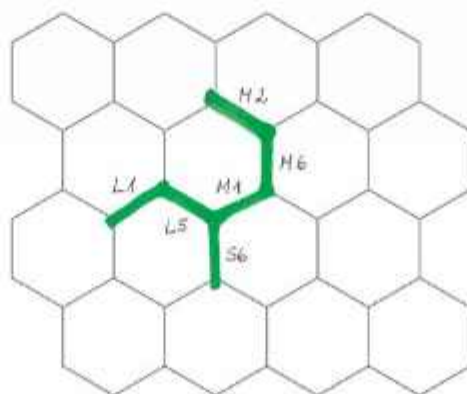

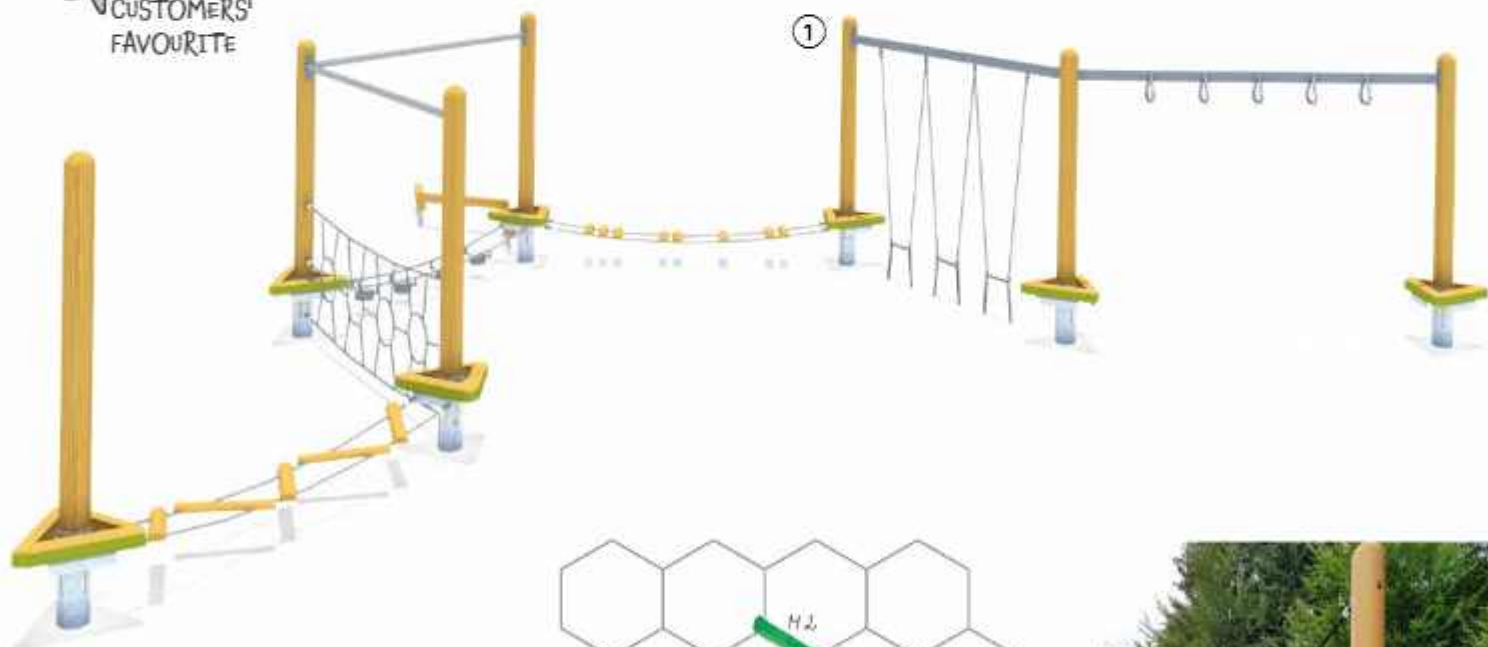

The active trail product line combines the fun of climbing, jumping, balancing, hand-over-hand climbing and romping with the promotion of children's physical development.

The modular, honeycomb-shaped balance and climbing concept offers a ground-level movement experience with an adjustable level of difficulty.

An active trail balance course not only stands for fun and challenge, but also has an educational added value. In addition to the joy of playing and moving, self-confidence, posture and social interaction are trained in a playful way.

「More nature for
you to explore!」

Playing in natural surroundings – with an individual concept for the highest standards of quality and play value.

paradiso play systems transform every playground into a magical land of adventure.

The irregular wood structure of the robinia and the organic forms give the play equipment a special vibrancy, appealing to the senses and inspiring children's imagination.

Natural colours and harmonious colour concepts emphasise the unique, natural character of the paradiso design. Exciting structures and walkways inspired by nature, as well as imaginative play elements and loving decorations, encourage children to play creatively, move around and interact socially.

「Up in the air on my favourite swing.」

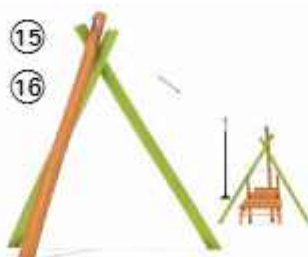

What could be better!

It's the classic in every playground and should never be missed.

Whether big or small, young or old, with or without a disability - the feeling of flying through the air on a swing and feeling a little weightless is wonderful and timeless.

With the eibe swing configurator, we can put together the swing of your dreams - tailored to the target group, their needs, the surroundings and the existing playground. Choose from our wood types, designs, colours and the diverse range of swing seats. The result is an exhilarating highlight for your playground and its users.

「Explore
the space!」

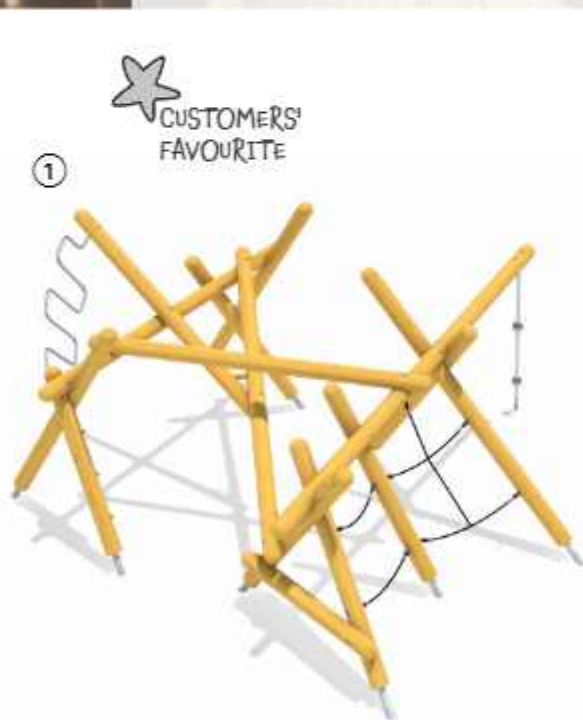

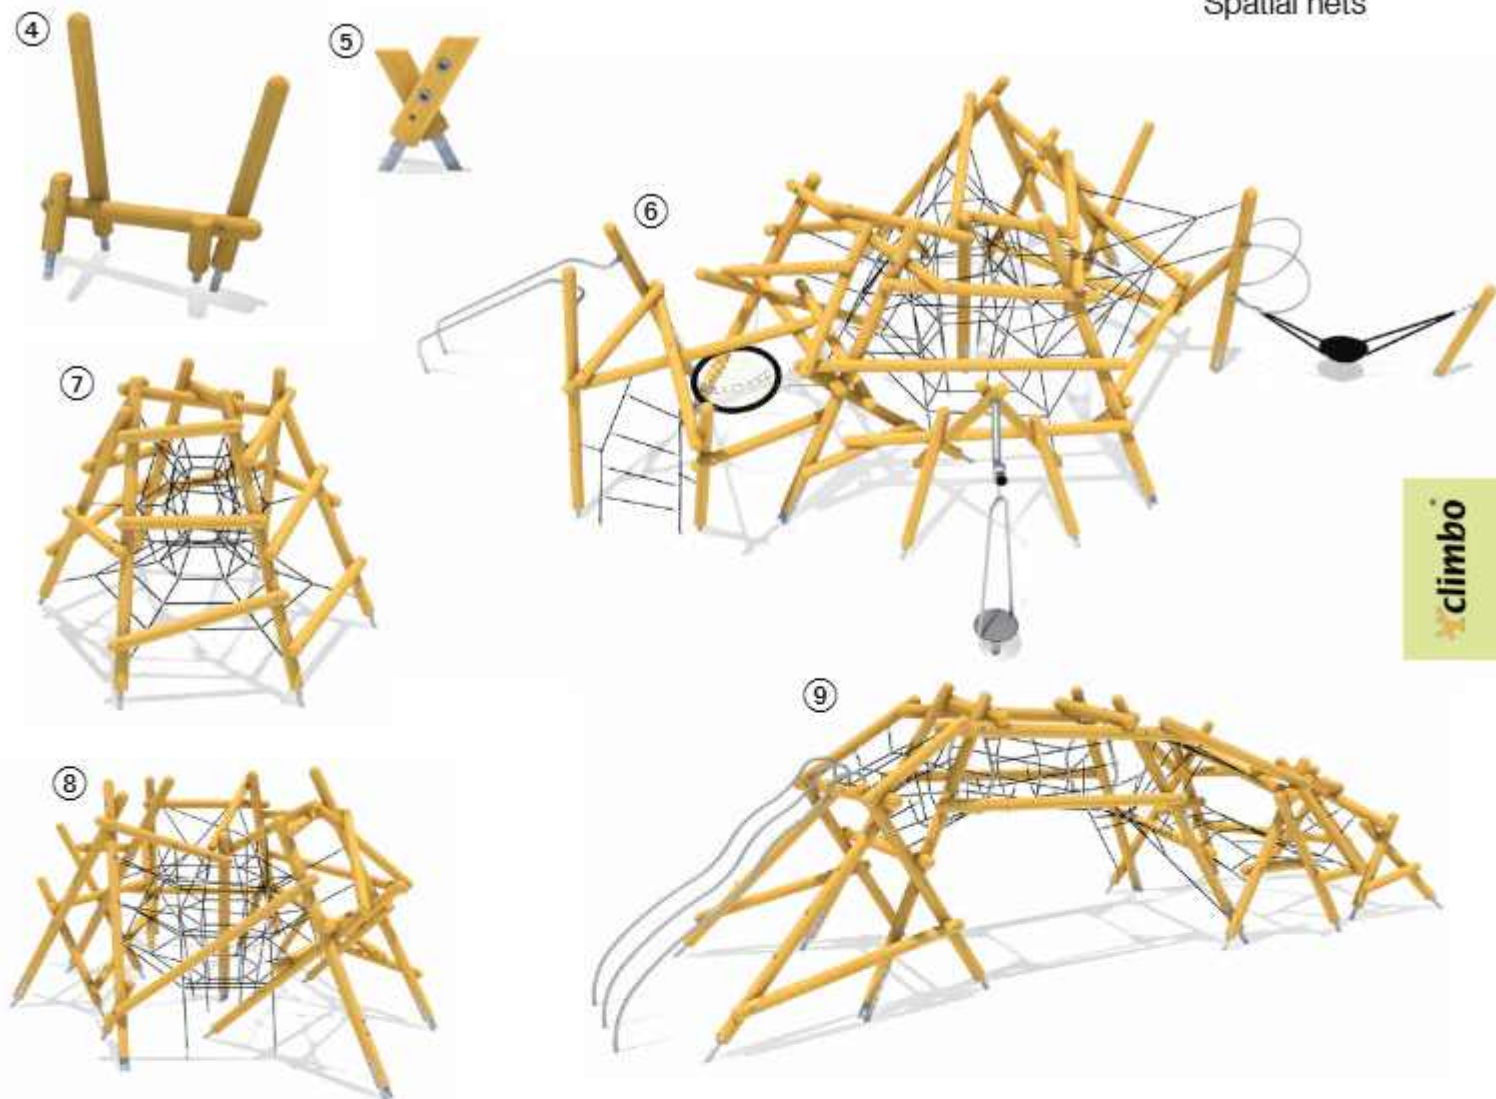

Children love climbing trees. The sense of achievement when they make it to the next fork in the branch helps them grow. It's a play experience as old as humanity itself and deeply rooted in our play instinct.

This idea was the basis for the development of eibe climbo. Structures that look as if they have been randomly stacked on top of each other, elegantly reduced to the raw material wood as the main component, this is how climbo symbolises the versatility and challenges of nature. All of this makes up our climbo experience.

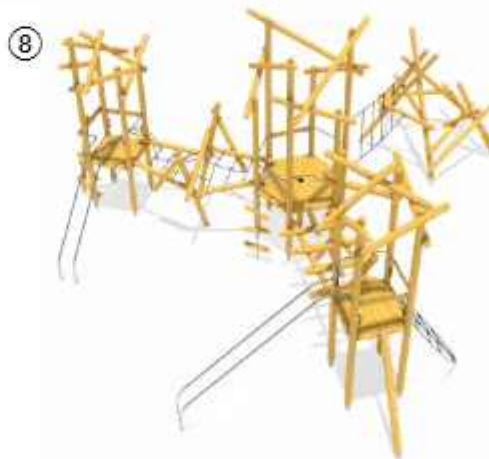

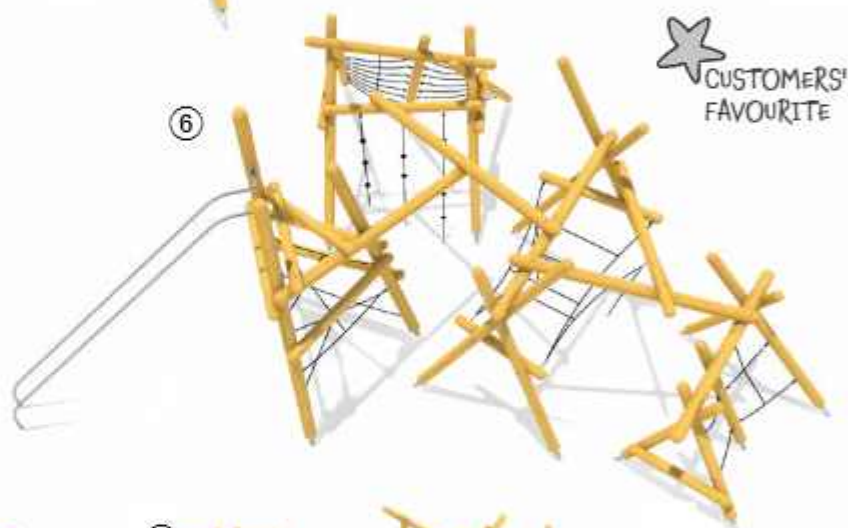

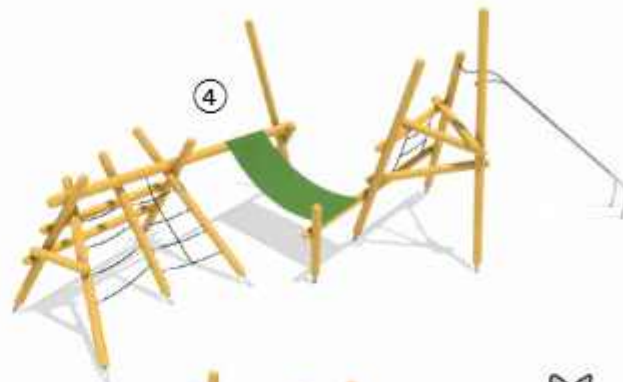

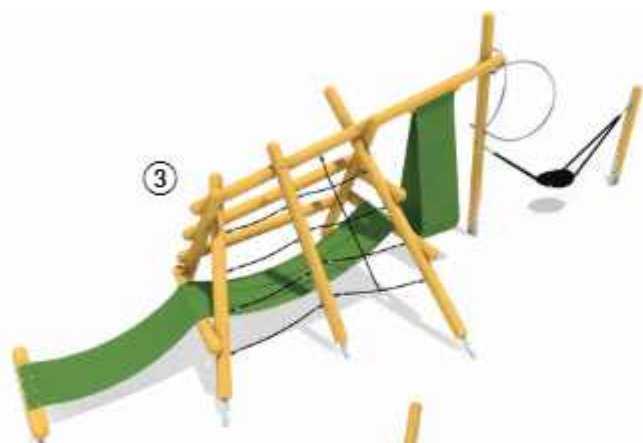

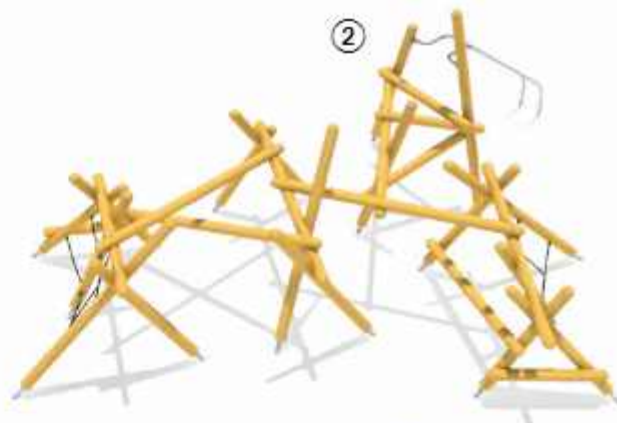

The play equipment challenges children in a special way, because they are free to choose their own way of using. The eye-catching design encourages children to explore the climbing structure creatively and find their own climbing route.

「Aiming high together」

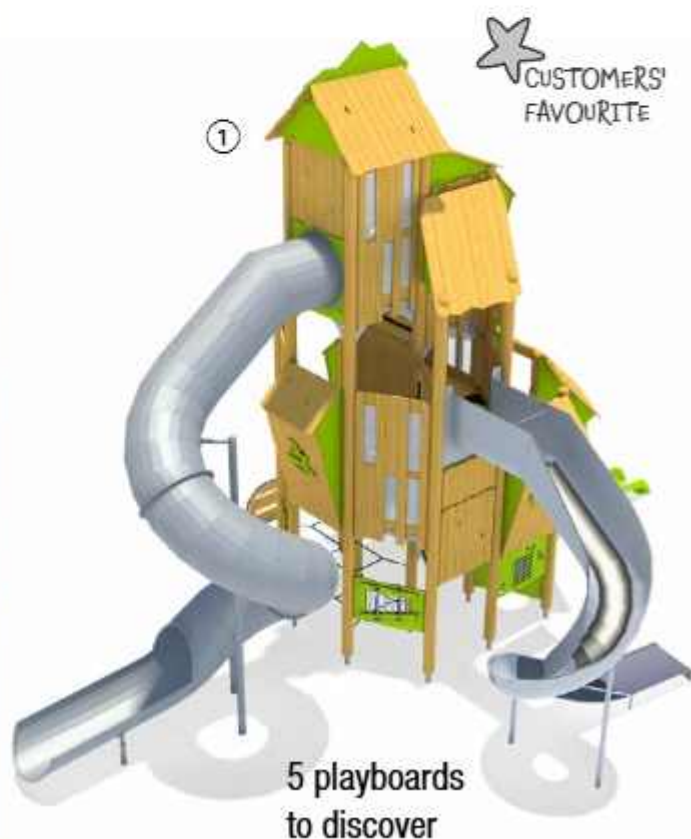

Wow! Worlds of play that amaze young and old alike.

From the ground level to the highest floors, unique play systems are packed full of play value, fun and movement, as well as exciting physical and cognitive challenges. There are almost no limits to the size of the system.

With our premium brand unique, your play systems in public spaces or in the leisure industry will be even more creative, exciting and magical. Create fascinating play concepts with a distinctive character.

unique is a modular system that can be individually combined: whether open or with secret nooks and crannies – you decide on the look and number of play levels. Depending on their age and ability, children can explore sensory elements at ground level or the higher climbing zones.

Up in the air on my favourite swing.

What could be better!

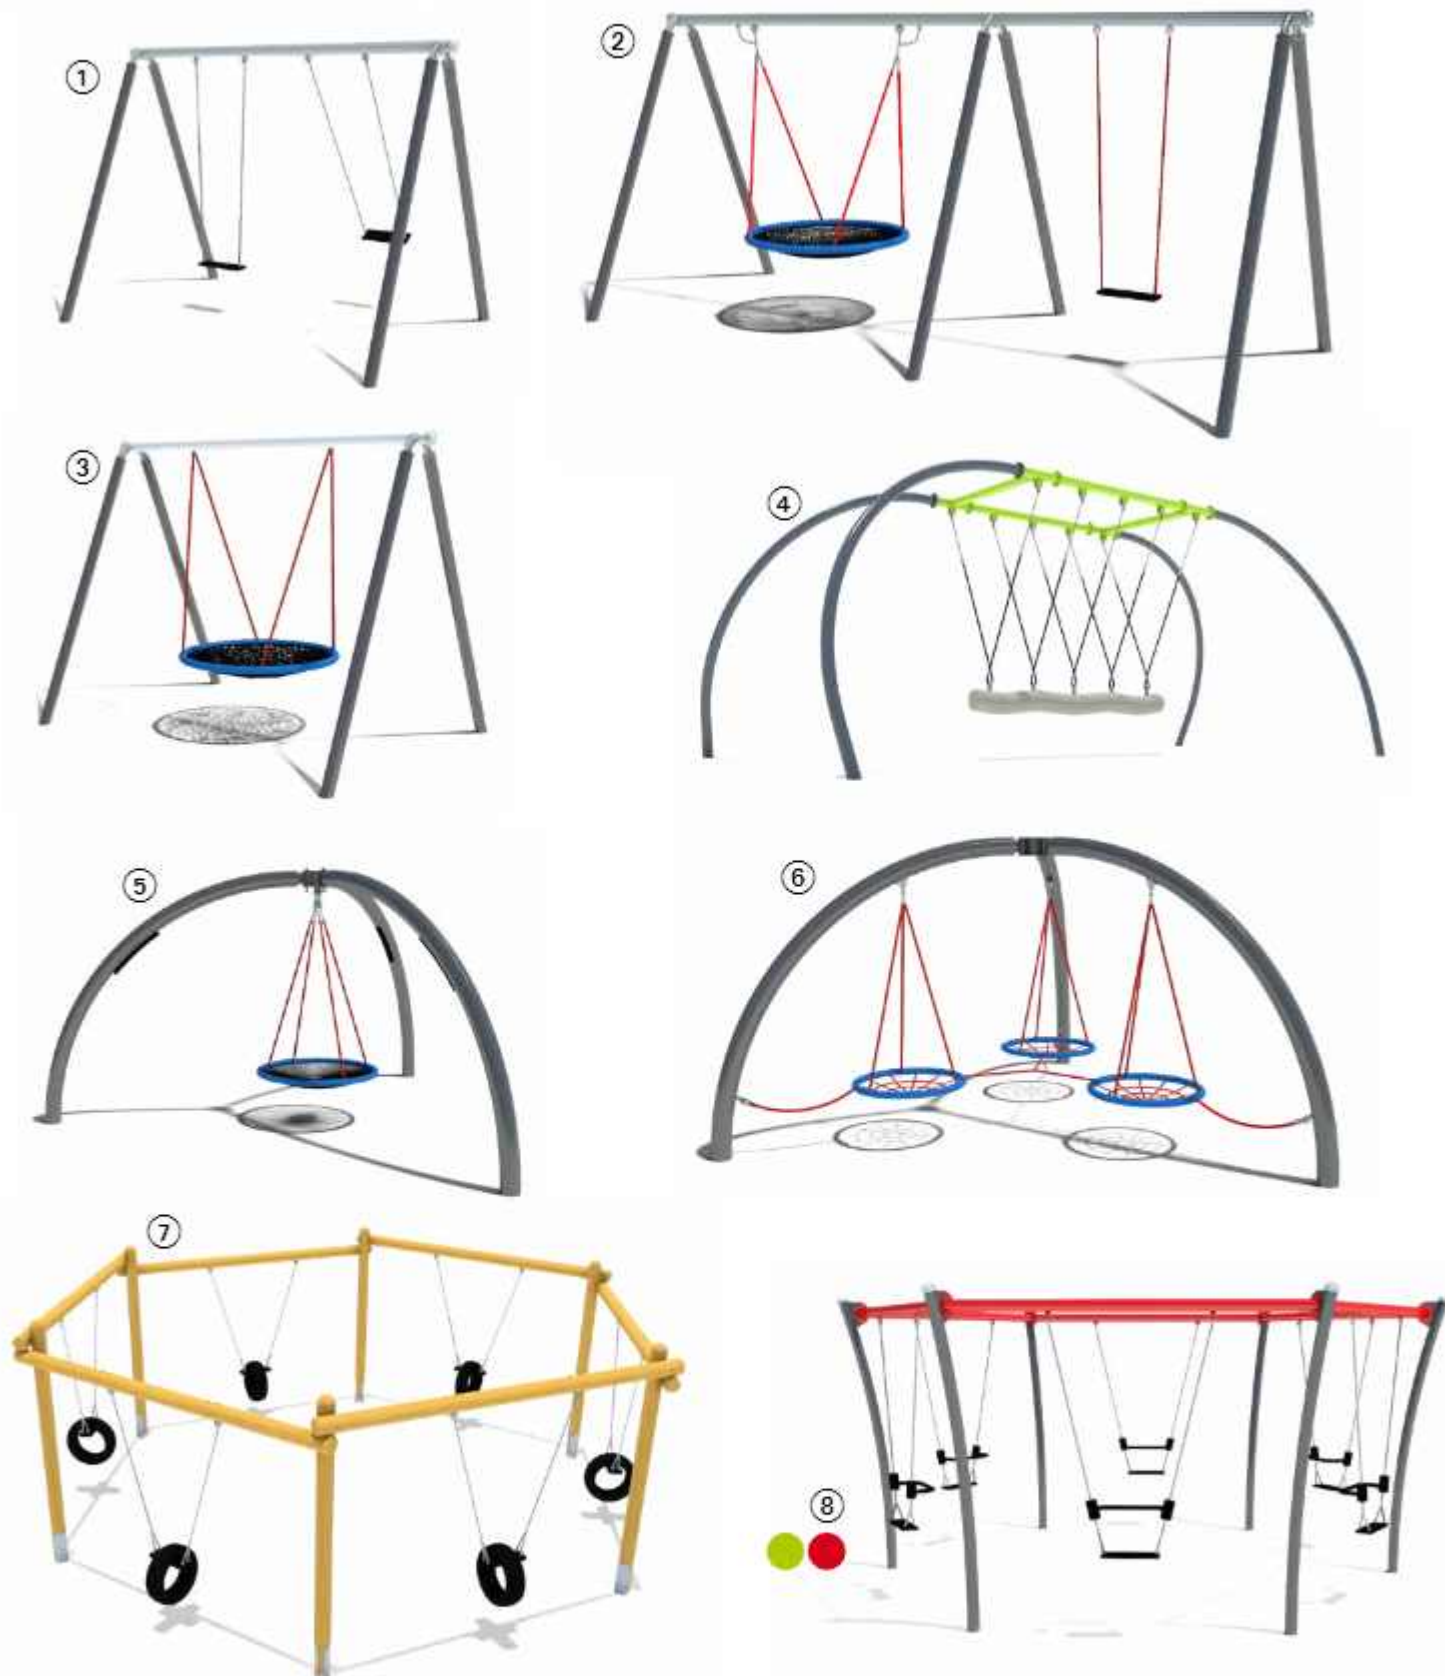

It's the classic in every playground and should never be missed.

Whether big or small, young or old, with or without a disability - the feeling of flying through the air on a swing and feeling a little weightless is wonderful and timeless.

With the eibe swing configurator, we can put together the swing of your dreams - tailored to the target group, their needs, the surroundings and the existing playground. Choose from our wood types, designs, colours and the diverse range of swing seats. The result is an exhilarating highlight for your playground and its users.

A close-up photograph of a child's hand reaching out to touch a yellow, curved play panel. The panel is part of a larger wooden play structure with various geometric shapes and textures. The background shows a sandy area and some greenery.

minimondo®

**「A voyage of discovery
for all the senses!」**

Even the youngest children can go on exciting voyages of discovery!

With minimondo and a comprehensive range of equipment for toddlers' and preschoolers' playgrounds, educationally valuable, age-appropriate and lovingly designed play worlds are created for children up to the age of four.

Each individual piece of equipment is specially designed for the play needs and ergonomics of this age group.

Sensory play elements awaken the curiosity of even the youngest children. All their senses are addressed as they touch and discover. Trying out, marvelling and understanding connections – this is how a child's personality develops in an age-appropriate way! The new minimondo colour schemes refresh the popular play equipment. The bright colours and animal motifs generate even more enthusiasm among the very young target group.

The logo for 'ecorino' features the brand name in a lowercase, sans-serif font. Above the letters 'o' and 'r' is a stylized red roofline icon. A registered trademark symbol (®) is located at the top right of the roofline.

「Bring movement
into play!」

ecorino

ecorino®

Tried and tested for generations and preserved for you: **playground classics for everyone**. The clear concept is suitable for both **public playgrounds and supervised areas**.

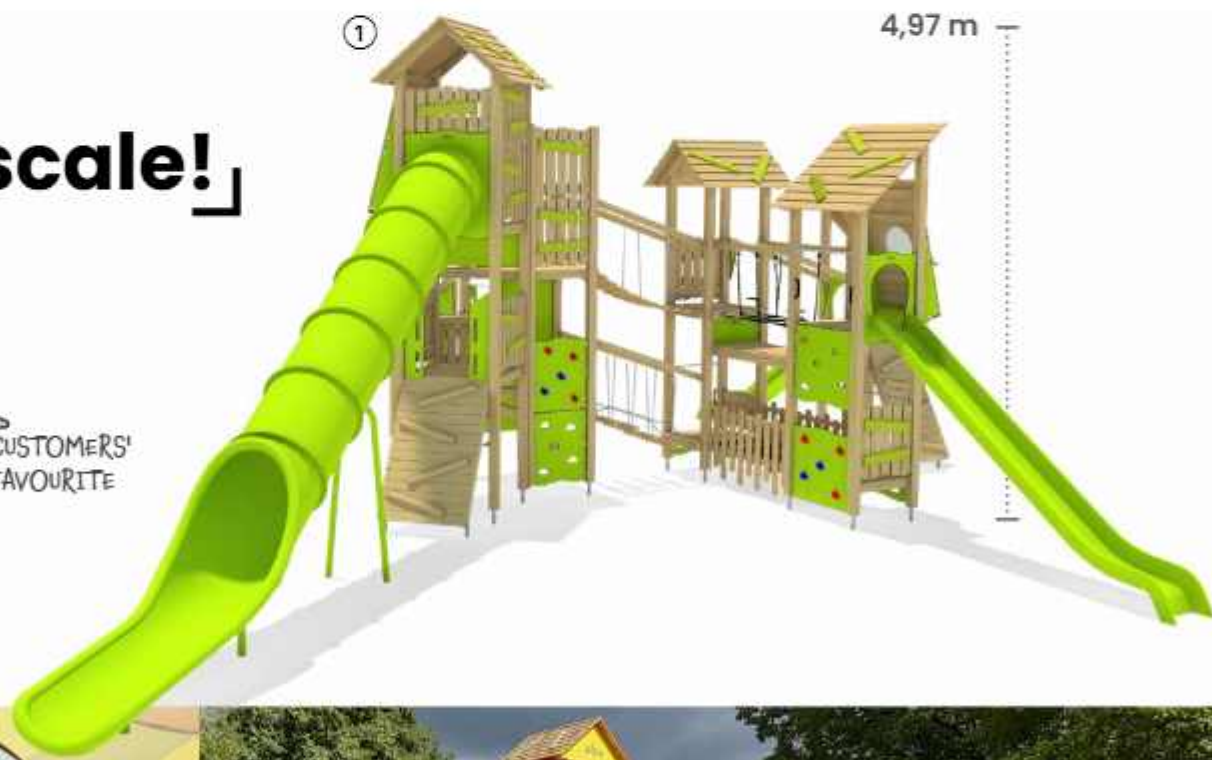

Packed with play value, imaginatively designed, children will find everything they love in a playground: holistic play fun that encourages creative play and movement.

ecorino play systems are modular in design. An extensive selection of elements and accessories allows for individual configurations for every spatial condition.

With this multi-faceted concept and its robust construction made of high-quality, carefully selected woods, combined with the restrained use of materials, it offers an optimal price-performance ratio. Long-lasting products keep maintenance and running costs for the playground low.

「Fun at every scale!」

What could be better!

It's the classic in every playground and should never be missed.

Whether big or small, young or old, with or without a disability - the feeling of flying through the air on a swing and feeling a little weightless is wonderful and timeless.

With the eibe swing configurator, we can put together the swing of your dreams - tailored to the target group, their needs, the surroundings and the existing playground. Choose from our wood types, designs, colours and the diverse range of swing seats. The result is an exhilarating highlight for your playground and its users.

Discover the new ecorino playpoints – the clever and budget-friendly solution for enhancing your playground!

Add compact but valuable extensions to your playground that increase the play value and give children the opportunity to discover and try things out. Whether it's balancing, challenging, role-playing, communicating, retreating or playing in the sand – the new play points cover a wide range of play areas and offer every child the right experience. The meaningful enhancements stimulate children's imagination, develop their motor skills and offer opportunities for quieter play phases.

playo[®]

**「Welcome to the
colourful & themed
world.」**

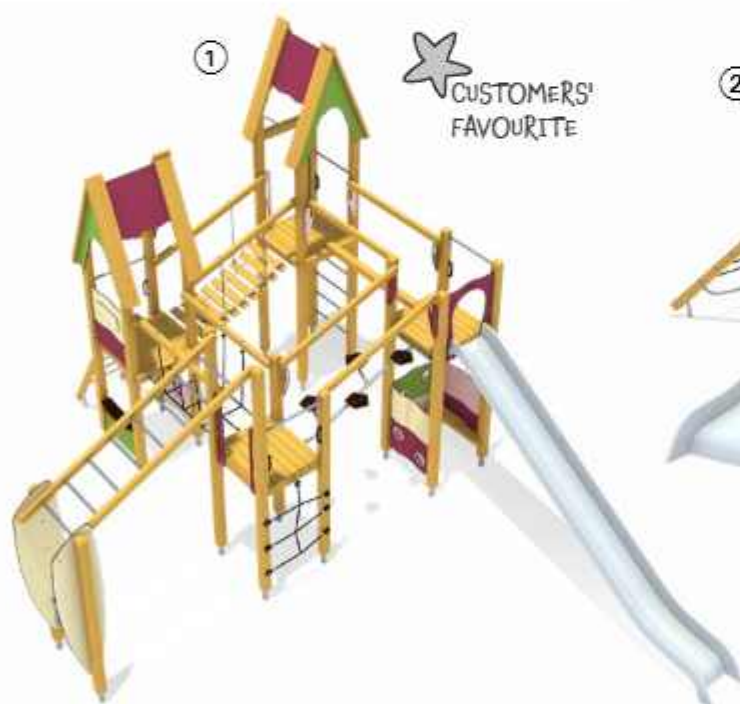

play

Welcome to the colourful world of playo!

Happy, harmonious colour concepts, aesthetically pleasing shapes, diverse themed worlds, exciting play and movement elements and loving decorations make the playo playground a sensual experience and ensure fun and enjoyment of movement. The programme offers little climbers and role players a lot of exciting, pedagogically well-thought-out play value at all levels.

The focus in the development of the multifunctional play systems is on supporting the cognitive, social and motor development of children from the age of one.

playo is endlessly modular. You can choose from a wide range of colours, themes and elements to put together your own individual systems. The solid wooden construction and the robust HPL material make the systems extremely durable and therefore also suitable for public spaces.

steelox

Metal can be so wonderfully playful!

Intense colours, exciting shapes, distinctive design and attention to detail combined with a high-quality mix of materials create a harmonious and imaginative interplay. With their lively design language with a stimulating character and the diverse play and climbing options, steelox play worlds motivate children to play and move, awaken their curiosity and inspire their imagination.

As attractive play areas with colourful aesthetics, they are eye-catchers in public spaces. They enhance, embellish and increase the amenity value for everyone. Whether in the city, in the park, in educational or leisure facilities – steelox transforms open spaces into playground dreams that can withstand any weather and any intensity of use.

steelox – our brand for the highest standards of play value, functionality and durability.

Flora Play

Climbing and balancing between giant blades of grass through the playground meadow with Flora Play.

The spring-green blades of grass are the supporting posts of these friendly play structures for little climbers. The equipment is designed like a climbing course and offers challenges for children aged between 6 and 12 with different levels of difficulty.

Powder steel, stainless steel, robinia wood and polypropylen are the high-quality materials from which the climbing meadow is made.

Mega

MEGA! Spectacular giant play structures with play towers over 8 meters high and endless fun and movement. The stability of the platforms and crossings also allows access for adults. Colorful and detailed windows, numerous play panels and imaginative decorative elements skilfully set the scene for the respective theme and whisk young and old away into a magical play world.

Materials of the highest quality were selected for Mega: Powder steel and stainless steel for the basic construction, as well as HDPE and HPL for the play panels, balustrades, platforms and decorative elements.

Organiq

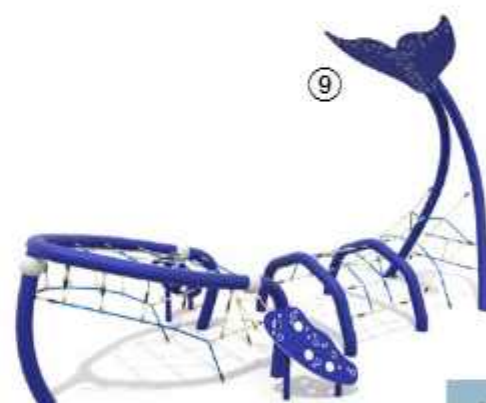

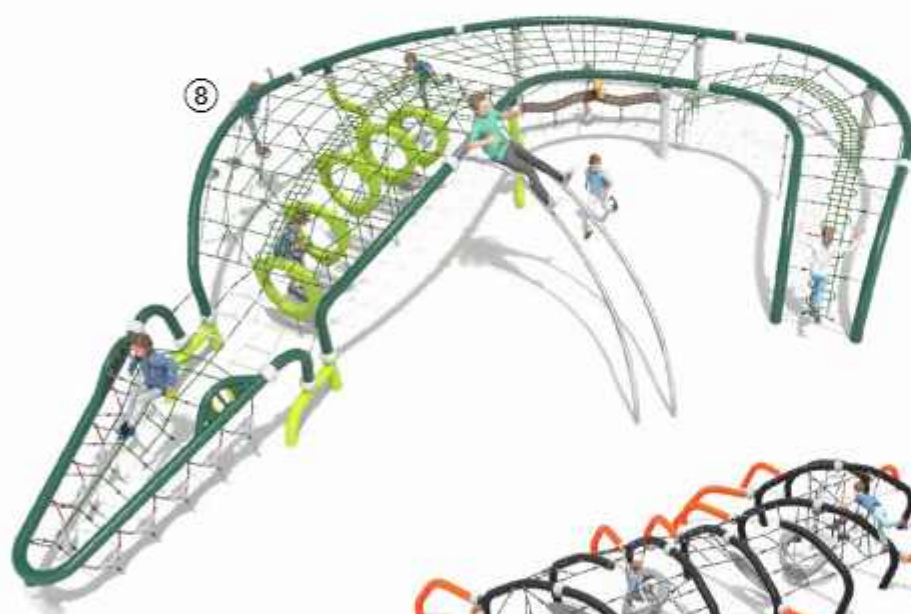

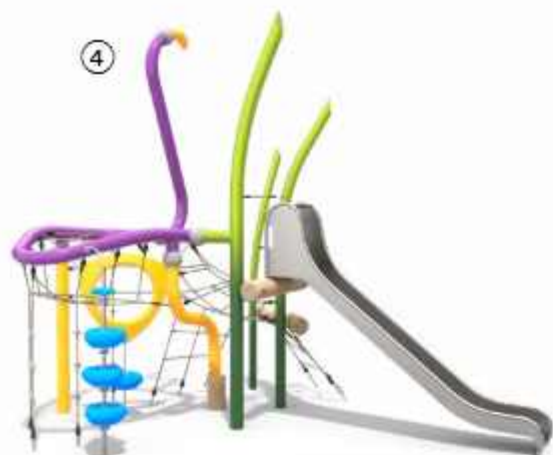

The play systems in the ORGANIQ product range are beastly cool.

The most fascinating animal creatures have found their way onto the playground here. An elegant grasshopper, a graceful spider, a whale with a swing in its fin, a busy bee and exotic creatures such as a toucan, giraffe and crocodile. The animal play worlds are inspired by nature and attractively designed with their organic shapes. They offer endless climbing possibilities and rapid slides.

Stainless steel, powder steel, HDPE and HPL are the high-quality materials from which the climbing animals are made.

Aquarius

Bright, intense colors, organic shapes and a futuristic design reminiscent of space travel are characteristics of the AQUARIUS product range.

The range includes play structures with one or more climbing towers as well as a large play ship, a fire engine and an impressive snowcat. For children aged between 3 and 14, the play structures offer plenty of variety and age-appropriate challenges. Play and learning panels, such as the popular tic-tac-toe, promote social skills, motor skills and intellect.

The high-quality material selection of sturdy powder steel and stainless steel as well as UV and weather-resistant HDPE and HPL ensure safety and durability.

Active

The Active product range offers play and exercise fun for children aged 3 and over.

With their characteristic blue and yellow color scheme, the equipment blends perfectly into any environment. The Active range includes both large play equipment with a length of up to 12 meters, as well as small combination play equipment and multi-climbing and horizontal bar equipment. The name of the product range stands for itself. With its varied ascents and transitions, nets and climbing walls, it offers young climbing enthusiasts plenty of play value and challenges and motivates them to exercise in the fresh air.

The powder-coated steel base construction ensures stability and durability. Colored play panels, balustrades and climbing walls are made of weather-resistant HDPE and HPL.

Mini

The play equipment of the brand MINI has been developed for children aged between 1 and 7.

With their colorful design, the equipment inspires children's imaginations. Varied play panels stimulate the senses and support children's motor development. The imaginative decorative elements of the play panels arouse curiosity and magically attract the little ones. Sophisticated design, careful workmanship and high-quality materials guarantee safe use and the longevity of the equipment.

The sturdy stainless steel base construction and the HDPE and HPL play boards are weatherproof and suitable for any climate.

Fresh air. Clear head. Fit body.

Sport and exercise are both prevention and good medicine - both for the body and for mental well-being. The eibe outdoor fitness range follows a holistic exercise concept and enables the creation of versatile sports, fitness and exercise areas for all ages and fitness levels - freely accessible and in almost any location.

Functional training as well as playful exercise with a fun factor for kids and young-at-heart adults - fit offers a variety of possible types of exercise and training components - for every activity area:

- > **Popular sports:** with classics such as goals, ball sports facilities, table tennis and large multi-sports fields, we offer a wide range of options for individual and team sports,
- > **Fitness:** Calisthenics facilities and the Natural Fitness range provide a balanced full-body workout and offer suitable training options for all ages and fitness levels.
- > **Mobility:** The movement stations offer people who want a gentle full-body workout the ideal workout conditions to gently achieve training goals such as endurance, strength, coordination, speed and mobility.

「Brings movement
into the game!」

Seating arrangements and park furniture

A well-designed playground not only impresses with innovative play ideas, but also proves its strengths in the things that happen 'only on the sidelines':

Quiet zones that promote social contact and communication, high-quality, durable seating, boundaries and all the important little things should not be missing under any circumstances!

Choose from beautifully designed benches and seating groups, robust loungers and entire seating landscapes. We have added accessories such as rubbish bins, bicycle racks, barbecues and more to our range to provide the perfect, practical solution.

「For small breaks and great relaxation!」

An amazingly simple system – pre-assembled seat and table surfaces are bolted to round, wooden palisades: The special design of the seat and table surfaces allows you to arrange seats and tables according to your individual requirements and available space – either upright or to an angle of up to 45°. Additional charm is provided by including our eibini figures in the system. These can be used as posts as with our rounded-head palisades.

The eibe rounded-head palisades for seat and table heights are supplied with ground anchors and screws, and can be bolted to foundations.

Basis

Our diverse range of different individual products and accessories for a completely inspiring playground. From individual slides, climbing equipment and swings to accessories, spare parts and fall protection.

As you would expect from eibe, these products are also characterised by holistically thought-out concepts that turn a simple playground into an exciting world of play. After all, our aim is always to inspire children completely.

Number of climbing grips
Depending on the age and skills
of the children, 5 - 10 grips are
required per square metre of
climbing surface:
3-6 years: 8-10 grips/m²
6-10 years: 6-8 grips/m²
10 years and older: 5-6 grips/m²

Easy access for all children with disabilities thanks to the integrated wheelchair ramp.

Floor trampoline, Vandalism-proof

With its wire reinforced centre and edges, the jumping mat is highly vandal-proof. The trampoline is particularly suitable for non-supervised areas.

Natural product, hand-crafted

The willow huts are made by hand and vary in size. eibe willow huts can be played in immediately and also form the static base for cuttings and climbing plants. An opening in the ridge, 3 window hatches and an arched entrance invite all children to play. The combination of willow huts of different sizes to form a "willow camp" encourages children to play together.

Willow is a natural product and as such will return to the natural cycle after an indefinite period of time, depending on where it is set up.

To increase the durability of the willow, it should be regularly painted with linseed oil. Planting willow cuttings, for example, will also increase its lifespan.

We combine your individual water playground!

Contact us

Pumps for connection to water network (no drinking water)

- Flushing duration and intervals adjustable as required
- Battery-powered – no additional power supply required
- Control unit mountable in the shaft
- Independent draining of pump during rest periods
- No standing water

Pump for connection to well and cistern

The water basin underneath the pump can be supplied from a well or a cistern. In order to avoid contamination, we recommend to change the water in the basin daily.

13

Please order the pump separately!

Our sun awnings are truly multitasking! They are a perfect sun protection from dangerous UV radiation. Furthermore the awning is a practical sand pit cover. By easy lowering to ground level, it protects from contamination of leaves, bird droppings or animal excrements.

- HDPE fabric
- 75-85% opaque
- 70-95 % shading
- dirt, mould and decay resistance
- high tear resistance
- no heat accumulation
- easy cleaning
- UV protection, UV filter 11-23
- no mould stains
- permeable to water and air

CorkeenPlay is an elastic fall protection surfacing system based entirely on the renewable raw material cork. The 2-layer, water-permeable cork granulate covering consists of a base layer made of untreated natural cork and a wear layer made of polyurethane-coated cork granulate to increase colour and weather resistance. Both layers are mixed on an MDI basis with a polyurethane binder.

Thanks to the natural properties of cork as a raw material, CorkeenPlay is fire-retardant, hypoallergenic, weather-resistant, odourless and lightweight. CorkeenPlay is certified up to a fall height of 2.82 metres in accordance with DIN 1177:2018 and is perfectly suited as fall protection for playgrounds, parkour facilities and fitness parks. The cork surface retains its high elasticity over the entire product life cycle and is fully recyclable at the end of its life.

Corkeen is the revolutionary cork flooring system for playgrounds made from natural materials.

Made from cork, a 100% organic material

Lower surface temperature

Excellent fall insulation

High elasticity

Odourless

Sustainable and environmentally friendly

eibiniLAND®

Too wet, too cold or too hot for outside? Never mind!

Indoor playgrounds offer a reliable solution for families seeking fun and entertainment when outdoor plans are foiled by inclement weather. Indoor playgrounds can attract families with children, as they provide a guaranteed source of enjoyment, regardless of the weather conditions.

With eibiniland you invest in an indoor play area of particular versatility and quality.

With a creative concept and a wide variety of themes, eibiniland appeals to children of all ages. Different needs such as areas for promoting physical activity, role play and social interaction as well as quiet areas are included in the design of an eibiniland play world.

Customisable!

An overview of the foundation levels

- 1 Prefabricated foundation
- 2 Cast foundation
- 3 Concrete floor plate
- 4 Loose impact attenuation, e.g. sand
- 5 Base layer, approx. 10 cm gravel
- 6 Underground
- 7 Impact attenuation tiles

foundation levels eibiniland

- 1 subsurface
- 2 wet pour impact attenuation
- 3 floor boards

Impact attenuation

► page 220

Examples of commonly used impact attenuating materials, depths and corresponding maximum free heights of fall.

Material ¹	Description (mm)	Minimum layer thickness ² (mm)	Largest possible free falling height (mm)
Turf/topsoil			< 1000
Bark	chopped bark of softwood trees, 20 mm to 80 mm grain size	200 300	< 2000 < 3000
Woodchip	mechanically chopped wood (no wood materials), without bark and foliage share, 5 mm to 30 mm grain size	200 300	< 2000 < 3000
Sand or gravel ³	0.2 mm to 2 mm grain size	200 300	< 2000 < 3000
other materials or other layer thicknesses	as tested according to HIC (see EN 1177)		critical fall height as tested

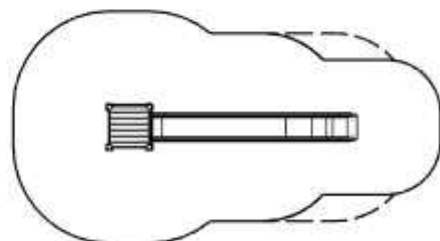

*1 Material carefully prepared for use on playgrounds

*2 For loose bulk material, 100 mm must be added to the minimum depth to compensate for displacement

*3 No silty or clay particles. Grain size may be determined using the screening procedure, such as EN 933-1.

Impact zone

Overview of the required shock absorbing features in the impact area according to EN 1176-1.

dotted line: impact zone without impact attenuation

continuous line: impact zone with impact attenuation
